Work Experience

Haiven

Remote

Assoc. Product Manager

Feb 2026– Current

- Lead market studies, technology research, collaboration with UX/Eng, problem definition, etc. (*Jira, Confluence, Atlassian Suite*).
- Developed partnerships with Google, Intel, & kID driving comarketing opportunities and monetary/non-monetary investments.
- Established product timelines verified by engineering, design, and stakeholders while maintaining expected deadlines. (React, Python, Figma, etc.)

Johnson Barrow

Spokane, WA

Project Manager

May 2025– Feb 2026

- Bid, priced, ordered, and closed out equipment from HVAC manufacturers, being the secondary sales, and primary PM contact for customers (*Microsoft Dynamics, Outlook, CoPilot, Microsoft Suite*)
- Concurrently carried 30-80 high-budget (\$5,000-\$5,000,000) projects from start to finish of job life cycle
- Managed 2 OSE's, exercising department ownership when reporting to leadership.

Boeing

Everett, WA

Quality Engineering Intern (*via PDS Defense*)

June – Aug 2023

- 1 of 8 Students in the US selected for the QA Engineering program
- Implemented LEAN principles to reduce travel and defects in design on 777/777X planes to FAR25 standards
- Used GD&T and first principles to design/build components
- Self-taught Python outside of work hours; built microblogs, facial recog., etc. as a basis for learning

Boeing (via PDS Defense)

Everett, WA

Engineering/Mfg Intern

June – Aug 2022

- Practiced riveting, drilling, print reading, requirements management, etc. in a mfg. environment
- Practiced ITAR standards
- Reduced wait times for quality checks by ~1hr

Projects/Activities

Self Organized

- Volunteered for 5+ months in Chile/Argentina
- Built wells, houses, livestock corrals, and power infrastructure for governmentally subsidized communities
- 1 of 3 known trekkers to summit Volcán Chillan in under 6 hours

Co-Host/Founder, DSI (Now UofI Entrepreneurship Podcast)

Project Engineer, Story Stands

- Designed and Manufactured 20 “Story Stands” for Orchard Park, City of Liberty Lake
- Managed 30 team members meeting deliverables within ~5 weeks
- Designed components/assemblies in SOLIDWORKS, including weld symbols using AWS 2.4 standards
- Designed and iterated custom tooling using GD&T

Education

Thomas Edison State University

Applied Mathematics, Data Science and Analytics (Concurrent Bachelors)
Class of 2029
